**COMPACT WALL-MOUNT**

The Studio Compact is based on our iconic Studio woodburner that was designed by renowned NZ industrial designer Peter Haythornthwaite. Choose from three model options, which can be installed straight or in a corner to fit your requirements.

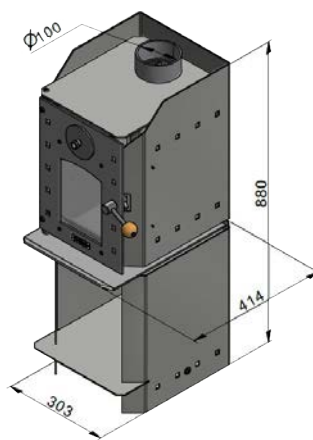

Handcrafted to perfection in our factory in Auckland, New Zealand, this woodburner is made from robust materials and will add value and appeal to your property. With a 10kW heat output, it will heat an area of up to 100m<sup>2</sup>.

This multi-functional fire will be the focal point of your space and provide you with enough heat and hours of enjoyment. Brew a pot of coffee or cook a meal on the 5mm steel cooktop. The wetback will assist with lowering your water heating costs, combined with the ambience only a real wood fire provides for a warm, healthy home.

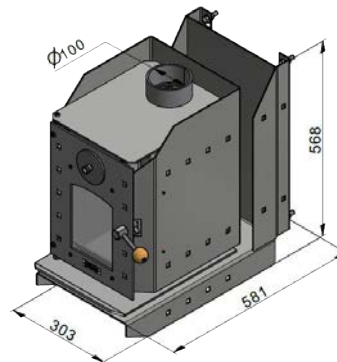

Being self-sufficient and living off the grid has never been easier.
