

# STUDIO

## THE CLASSIC WOODBURNER

- 5 MM STEEL COOKTOP
- UP TO 13 KW HEAT OUTPUT
- HEATING AN AREA OF 80-150M<sup>2</sup>
- CLEAN AIR APPROVED (STOVE MODEL)
- WETBACK OPTION
- AVAILABLE IN 7 COLOURS (STOVE MODEL)
- INTEGRATED OVEN (OVEN MODEL)

The iconic design by renowned New Zealand industrial engineer Peter Haythornthwaite makes this Woodburner an eye-catching feature in both contemporary as well as traditional interiors. With a high heat output, robust construction and unique design, your Studio will stand the test of time. Featuring a 5mm cooktop and wetback. The Stove model has ample wood storage space, while the Oven model is a joy to do off-the-grid baking in.

There is nothing that beats the sound of a crackling fire, the smell of dry wood burning combined with the comforting heat radiating from a wood fire. Whether you are a city dweller or a rural homeowner, a Studio Woodburner will be an asset and a joy to have. The perfect companion, whether you are spending quality time with your loved ones, entertaining friends or just enjoying a book on your own.

Warmington Fires are designed and handcrafted in our factory in Auckland, New Zealand. With many of our installations in coastal areas, this means using quality materials and unique features to give an enduring solution without compromise.

Our fires are tested to comply with the National Emission Standards.

We produce a range of accessories, including wetbacks that reduces environmental impact and floor protectors, which can be laid directly over a combustible floor.

We also offer a refurbishing service to give your used Studio a brand new and fresh look.
